 scale 1/4" = 1'-0"  
 0' 4' 8' 16'

**Wall Types Legend:**

- W1** EXTERIOR: Existing exterior masonry building wall to remain. Provide 2x4 wood stud framing at interior side with one layer 1/2" gyp.bd. Provide R-19 insulation, typical. Tape, bed, texture and point. Paint exterior, typical.
- W2** EXTERIOR: Existing exterior partial height masonry wall with 2x6 wood framed wall above to remain, provide new exterior painted stucco finish over lath & scratch coat and weather resistive barrier over existing framing. Paint existing masonry.
- W3** EXTERIOR: New exterior painted stucco finish over lath & scratch coat and weather resistive barrier over 2"x4" wood stud framing with one layer 1/2" gyp.bd. Provide R-19 insulation, typical. Tape, bed, texture and point. Paint exterior, typical.
- W4** INTERIOR: Existing masonry building wall to remain. Point of exposed side. Provide 2x4 wood stud framing at kitchen side of masonry with one layer 1/2" gyp.bd. at exposed side. Tape, bed, texture and point.
- W5** INTERIOR: Existing masonry building wall to remain. Point of exposed side. Provide 2x4 wood stud framing at both sides of masonry with one layer 1/2" gyp.bd. at exposed side. Tape, bed, texture and point.
- W6** INTERIOR: 1/2" gyp. bd. sheathing on both sides over 2"x4" wood stud framing of interior wall. Provide sound batt insulation between all living and private spaces. Use DensShield® in all wet areas. Full height. Tape, bed, texture and point.
- W7** INTERIOR: 1/2" gyp. bd. sheathing on both sides over 2"x4" wood stud framing of interior wall. Provide sound batt insulation between all living and private spaces. Use DensShield® in all wet areas. Full height. Tape, bed, texture and point.
- W8** INTERIOR: Partial height wall to be ~34" a.f.f. - 1/2" gyp. bd. sheathing at exposed side over 2"x4" wood stud framing. Use DensShield® in all wet areas. Full height. Tape, bed, texture and point.
- W9** EXTERIOR: Fill existing opening in exterior masonry wall. Tuck masonry into each full cell adjacent to opening. Grout solid as required. Paint exposed side.
- W10** EXTERIOR: 16" square slump block masonry post base to ~36" a.f.f. Solid grout entire base and prep for future shade canopy (under separate permit/ty others). Paint.
